

COC19™

Certificate of Compliance

Compliant for Active Biological Threat Security using Security Protocols for Covid-19

IT'S **HIM** HUMAN
INVESTIGATION
MANAGEMENT

The Most Important Certificate for this moment in time

Rite of Passage

The Bearer of the COC19 is fully aware of the responsibilities of using security protocols for covid-19 and ensures that technology, equipment and manpower comply with governance principles. This is to ensure a the appropriate level of protection for all visitors and staff of a specific location The bearer undertakes to use distinctive protocols specially designed for purpose specific sites.

Objectives

Business

Profit Protect

Customers avoiding the site would reduce the revenue stream

New Crime associated to the threats would erode profits

Knowledge

Avoid Reputational Damage

Knowledge provides atmosphere of professionalism

Manpower

Increase Longevity

Reduce sick leave

Trust and Respect

Improve Co-operation by staff and customers or visitors

Applications

Venues	Buildings	Housing	Industry
Regardless of size Entertainment centres	Offices and Branches Apartment Buildings Malls Estates	Rehabilitation centres, Hotels and Lodges, Boarding Schools, Nursing homes and Ships.	Any manufacturing plant or retail outlet

Technology

The Technology and equipment complies with "certain standards"

The use technology and installation of such meets the standards

Manpower

Layered manpower by skillsets for reducing violent incidents

Equipped and relatively skilled for Physical intervention

Educated to use relative protocols for specific sites

The security sector define covid-19 quite differently to the health community. This is an active biological threat with multiple threats tailing

The protocols take into consideration technology, equipment and skills required to limit the levels of collateral damage

Security Protocols for CV-19

The group or site of interest must comply with:

Equipment Criteria

- Using Authentic credible and legitimate CCTV Thermal imaging or non-contact thermometers ([FDA](#)) or any such health regulator in your location.
- [IPVM](#) could be used to verify the brand performance or if the brand has been banned or has controversial issues.
- The equipment must be correctly used and installed (FDA)
- There should be no alarm that triggers 'sound alerts' in public areas if a person's temperature is of concern so as not to stimulate panic.

Manpower

The staff should be knowledgeable with specifics and layered by skillsets

- The security staff in different fields of interest are using the appropriate security covid-19 protocols for example, a mall or office building has different protocols for hotels, quarantine centers, nursing homes, rehabilitation centers, boarding schools, or old aged homes.
- The security staff that are taking temperature is managed by a manager or supervisor that has conflict management, leadership, or any other form of skills and character traits to calm people down.
- The frontline security that may need to use physical intervention as in medical grade masks and front line staff with high probability of dealing with aggressive behavior must wear facial shields or goggles because the eyes are just as porous as the mouth. People that are upset tend to spit when they shout or spit at others out of contempt.

Application and Compliance Conditions

The bearer of the COC19 Security Covid-19 Protocols undertakes to present to the oversight body (could be direct or via assessor)

- The bearer's affirmation undertakes not to change, alter or add technology and equipment and if so, will inform the awarding body to update their file.
- The bearer undertakes to ensure that the equipment or technology is correctly installed and the users of such are trained accordingly.
- Furthermore, the bearer of the certificate has ensured that their staff have had the appropriate training on HIM security covid-19 protocols for their site of responsibility.

Resilience

The certificate should be renewed yearly so that the bearer is in a constant state of information awareness. The threat could mutate and may call for additional protocols or perhaps technology and equipment being developed that can assist with limiting the level of collateral damage.

Compliance Confidentiality

The bearer of the Certificate must not provide any details of technology or equipment being used for assessment. It is vital that no perpetrators obtain such information for example, a make/model number of a safe or even a camera

Verification

The bearer will be vetted by an HIM Assessor related to an Oversight Body

Compliance Procedures

Refer to the websites of relative Oversight Body by clicking on their logo here (CAPSI, India or ISIO, Global)

Security Success

depends on

The level of situational awareness

- . of the people (decision-makers) on the ground
- and their reaction speed
